

VISTA Walk-in closet

STRUCTURE

Tracks made of aluminium, single or double track, wall mounted or ceiling mounted.

Sliding rollers made of die-cast zinc alloy with nylon castors. The doors are anchored by means of antislip elastomeric gaskets. The sliding mechanisms can be adjusted in height.

Wooden doors made of 2.5 Th engineered wood panels.

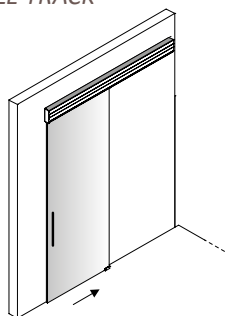

Glass doors made of 0,8 cm tempered glass.

It is not possible to use different types of doors/fixed panels on the same track.

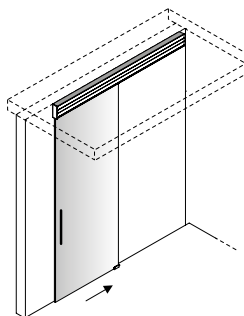

The wooden doors are equipped with a visible adjusting device; the lacquered glass doors cannot be used as room dividers as the lacquer is visible in the back side of the doors.
